

Customer information according  
to the EC regulation on chemicals  
**REACH**

## Customer information according to the European Community Regulation on chemicals - REACH

On 10<sup>th</sup> September 2015 the European Court of Justice issued a verdict with wide implications in relation to the REACH directive on chemicals. The new regulation states that manufacturers and sellers of products also have a duty of notification and information in cases where the mass concentration of a substance of very high concern (SVHC) exceeds 0.1 percent in a homogeneous component of the product, and not just in relation to the overall product.

We inform you in accordance with current legal requirements about specific substances which are used in our products directly after we have been informed by our own supplier. Our products use lithium CR primary round cells amongst other things. According to art. 33 REACH the following products are classified as products:

Product family	Product group	QUNDIS number
Heat cost allocator	Q caloric	HCA5x
Gateway	Q gate	WTX16.x
Network node	Q node	WTx16
Radio modules	Q module	WFZ16.x, WFZ166.x
Impulse module	Q module	AEW3x.x
Impulsadapter	Q module	AEW3x.x

Art. 33 para. 1 REACH stipulates that the supplier of a product which fulfils the criteria of Art. 57 REACH and contains a substance included on the ECHA candidate list must provide the purchasers of the product with certain information, at least the name of the substance. This applies at least when the identified substance is used in a concentration of 0.1 mass percentage (w/w) in the product.

For this reason we are informing you that according to information from our supplier that the lithium CR primary round cells which are built into our products contain a substance on the ECHA candidate list. The name of this substance is: "1,2-dimethoxyethane; ethylene glycol dimethyl ether (EGDME) – CAS-No. 110-71-4".
