

# Q gateway 5

The Q gateway 5 is a powerful device that enables the monitoring of all measuring devices and network nodes of a property through automatic remote data transmission.

It captures the consumption data from up to 2,500 measuring devices from 5 networks\* and transmits it via encrypted 2G / 3G / 4G mobile radio transmission to the QUNDIS smart metering platform Q SMP. From there, all data is automatically transmitted via email or SSH FTP.

The device is equipped with a SIM card at the factory. The configuration of the Q gateway 5 can be done via the Q SMP.

Q gateway 5 of the type RNG5 xxxR 2xxx are battery-operated. The mains-powered version RNG5 xxxR 1xxx is available for daily readout.

In addition to a variant for indoor use, QUNDIS offers a variant for extended ambient conditions with protection rating IP65.

<sup>\*</sup> Details according to the service descriptions for gateway services

#### Features and functions

The Q gateway 5 combines automated secure internet connection via 2G / 3G / 4G mobile radio and secure bidirectional radio networking in the smart meter subsystem.

The storage of consumption data and status data, intelligent management and control of measuring devices, configuration and diagnosis of the Q gateway 5 are cloud-based and controlled via the Q SMP. Only a web browser is required for use.

By using high-performance batteries and extremely low power consumption, gateways of the type RNG5 xxxR 2xxx achieve a service life of up to 10 years. This makes the Q gateway 5 the ultimate solution for applications and projects that require complete energy autonomy.

The system contributes to significant savings in time, effort and costs, and the quality of the service leads to increased customer satisfaction.

- > Wireless M-Bus 868 MHz
- ▶ excellent ISM radio reception
- ≥ 2G / 3G / 4G mobile transmission
- > secure mobile data transfer in the ISM band and via mobile radio
- highest possible wireless connectivity through national and international roaming
- automatic selection of the optimal network guarantees maximum operating time
- ▶ Battery operation, designed for up to 10 years depending on the operating scenario, 5 years guaranteed in accordance with the Terms and Conditions QUNDIS Gateway Service Description (GSD-II valid from 01.01.2020)
- ▶ integrated GSM and ISM antennas
- > pre-installed SIM card and independent configuration of key parameters
- wall mounting indoors
- > simple installation at the site
- management via Q SMP (QUNDIS Smart Metering Platform)

## Type overview

Type*	Power supply	Type*	Housing variant
RNG5 xxxR 2xxx	Battery	RNG5 xx2R xxxx	Indoor
RNG5 xxxR 1xxx	Mains connection	RNG5 xx1R xxxx	for extended ambient conditions

<sup>\*</sup> x = variable option code

### General information and user interfaces

- ▶ LC display
- ▶ Two-colour optical LED display (red/green)
- Buzzer: 4 kHz, 75 dB

## Technical data

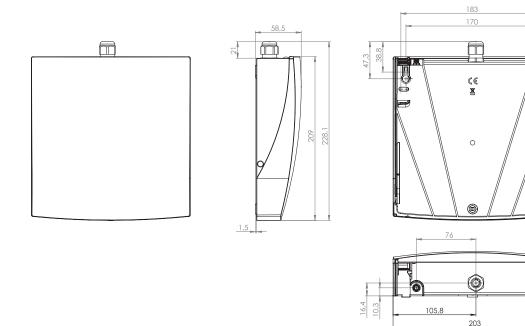

QUNDIS GmbH hereby declares that the Q gateway 5 complies with Directives 2014/53/EU (RED) and 2011/65/EU (RoHS). The full text of the EU declaration of conformity is available at the following internet address: www.qundis.com
